

ROMUAS NEWSLETTER

July, 2023 / Vol 3

Recover outdated machines using Arduino for scaling up ESTEAM and green skills in VET students

Create an effective and repeatable model at the European level of teaching new tools and skills for VET students, recent graduates in scientific and technological fields and VET, to scaling up their skills in order to support employment and promote social cohesion within future society and world of work.

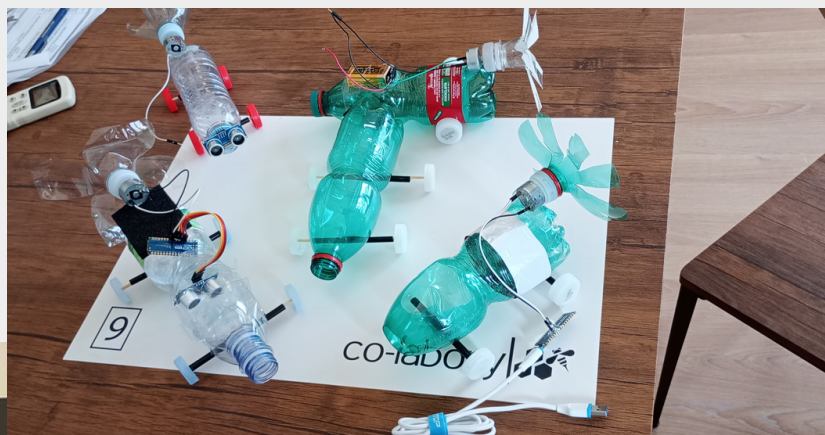

Co-funded by the
Erasmus+ Programme
of the European Union

What's new on ROMUAS project:

1. LTTA in Italy
2. PRs work in progress
3. ROMUAS Final conference

ROMUAS Learning Teaching Training Activity

On 12-13 and 14 July 2023 ROMUAS partners met in Trani for the training activity. The participants during these days were able to implement their skills on various topics: Arduino, Green Skills, Entrepreneurial skills, communication. The results were very satisfying in terms of new knowledge acquired, exchange and active engagement of participants.

Project results work in progress

The LTTA was also a time to test the project results developed and in the finalization phase PR2 ICT TOOL PR3 ONLINE PLATFORM Participants had the opportunity to test their functioning and share useful feedback and suggestions to soon release the final version of the results, which will be available in all partner languages.: English, Romanian, Croatian, Italian, Portuguese and Spanish.

ROMUAS Final conference

In October the partners will meet again in Romania for the final conference of the project hosted by the coordinator *Colegiul National Unirea*. Preparations for this important dissemination event of the project and its results will begin shortly.
